

VT AJ Bell Cautious

As at 31 March 2024

Investment objective

The fund aims to make a positive return over 5 years, however the size of gains (or losses) are likely to be limited by the requirement to remain within a certain risk profile. Over shorter periods the fund may lose value as it invests in securities that can go both up and down in price. It looks to achieve this by investing mainly in assets such as cash and bonds. It also has riskier holdings in company shares.

Investment approach

By spreading out the investments across regions, sectors and different types of assets, the fund aims to achieve its return objective whilst minimising price variation where possible. It does so by investing mainly in collective investments, such as funds and ETFs. These products mainly hold typically lower risk assets such as cash and bonds, with smaller holdings in company shares. The fund also directly invests in some government bonds.

The AJ Bell investments team uses in-house modelling to deliver a long-term approach that combines different assets. This aims to efficiently deliver returns without compromising investors' tolerance for risk.

Our focus on long-term investing helps minimise transaction costs, ensuring that there is minimal impact on the fund, however the asset allocation and selection is constantly monitored, and underlying holdings will be changed when appropriate.

(1) The Ongoing charges figure (OCF) includes the underlying OCF, the annual management fee, and the costs for running and administering the fund structure. The annual management fee is variable, as it consists of the fixed OCF, minus all other costs.

(2) Transaction costs represent the net costs incurred by the fund in buying and selling underlying investments. These are the gross costs offset with any pricing mechanisms used by the fund to protect investors from the cost of transactions (such as swing pricing). In some instances this may result in a negative number.

(3) Due to its multi-asset nature, no financial instrument or index represents a fair benchmark for the Fund. However, to give context and enable an objective assessment of the Fund's performance, the IA (Investment Association) Mixed Investment 0-35% Shares sector average is included for reference. The Fund does not aim to track the IA sector as a benchmark. Performance is calculated on a net of fees basis. This fund launched on 18 April 2017.

The Dynamic Planner Risk Target Managed (RTM) scheme has risk profile bands ranging from 3-8, with 8 being the highest. It is based upon proprietary research and analysis of the long-term forecast returns and volatility of the Dynamic Planner asset and risk model.
