

## VT AJ Bell Passive Adventurous

As at 31 October 2017

### Investment objective

The fund looks to deliver long-term capital growth with a high level of exposure to higher risk assets such as equities and a low level of exposure to lower risk assets such as cash and fixed income.

### Investment approach

The fund looks to deliver the maximum return possible for a level of risk that investors are comfortable with.

To do this, the fund gives exposure to a highly diversified portfolio of assets including equities, bonds, commercial property and cash to deliver long-term returns with a more predictable investment journey by smoothing out the worst of market volatility.

The AJ Bell investment team works closely with highly regarded economists from Moody's Analytics to deliver a long-term approach that combines different assets to efficiently deliver returns without compromising investors' tolerance for risk.

The fund invests in low-cost passive strategies that are designed to track the performance of indices such as the S&P 500 Index, the FTSE All-Share Index and the Barclays Sterling Corporate Bond Index to give exposure to a variety of asset classes across a diversified range of global markets. In addition, our focus on long-term investing helps minimise transaction costs, ensuring that there is minimal additional impact on the fund.
