

VT AJ Bell Passive Moderately Cautious

As at 30 June 2018

Investment objective

The fund looks to deliver long-term capital growth with a preference towards lower risk assets such as cash and fixed income and less emphasis on higher risk assets such as equities.

Investment approach

The fund looks to deliver the maximum return possible for a level of risk that investors are comfortable with.

To do this, the AJ Bell Investment team uses in-house modelling to design a highly diversified portfolio combining assets including; equities, bonds, commercial property and cash. This process has the consistent aim of delivering long-term returns, whilst smoothing out the worst of the market's volatility, to give a more predictable investment journey. This delivers returns efficiently, without compromising investors' tolerance for risk.

The fund invests in low-cost, passive instruments, such as ETFs and Index funds, that are designed to track the performance of indices such as; S&P 500 Index, FTSE 100 Index and Barclays Sterling Corporate Bond Index, to give exposure to a variety of asset classes across a diversified range of global markets. In addition, our focus on long-term investing helps minimise transaction costs, ensuring that there is minimal additional cost impact on the portfolio.
