

VT AJ Bell Cautious

As at 30 September 2020

Investment objective

The fund looks to deliver long-term capital growth with a high level of exposure to lower risk assets such as cash and fixed income and a low level of exposure to higher risk assets such as equities.

Investment approach

The fund looks to deliver the maximum return possible for a level of risk that investors are comfortable with.

To do this, the AJ Bell Investment team uses in-house modelling to design a highly diversified portfolio combining assets including; equities, bonds, commercial property and cash. This process has the consistent aim of delivering long-term returns, whilst smoothing out the worst of the market's volatility, to give a more predictable investment journey. This delivers returns efficiently, without compromising investors' tolerance for risk.

The fund invests in low-cost, passive instruments, such as ETFs and Index funds, that are designed to track the performance of indices such as; S&P 500 Index, FTSE 100 Index and Barclays Sterling Corporate Bond Index, to give exposure to a variety of asset classes across a diversified range of global markets. In addition, our focus on long-term investing helps minimise transaction costs, ensuring that there is minimal additional cost impact on the portfolio.
