Type of Company

VT Allium Portfolio Funds (the Company) is an investment company with variable capital incorporated in England and Wales under registered number IC000884 and authorised by the FCA with effect from 4 March 2011. The FCA product reference number (PRN) is 538701. The Company has an unlimited duration.

Shareholders are not liable for the debts of the Company.

The Company is structured as an umbrella company, in that different Funds may be established from time to time by the ACD with the approval of the FCA. On the introduction of any new Fund or Class, a revised prospectus will be prepared setting out the relevant details of each Fund or Class.

The Company is a Non-UCITS Retail Scheme (NURS).

The assets of each Fund will be treated as separate from those of every other Fund and will be invested in accordance with the investment objective and investment policy applicable to that Fund. Investment of the assets of each of the Funds must comply with the COLL Sourcebook and the investment objective and policy of the relevant Fund.

Any proposals to change a Fund's investment objective or investment policy will typically be treated by the ACD (with the agreement of the Depositary) as a "fundamental event" requiring prior approval of the majority of Shareholders in the Fund (see section 8 "Shareholder Meetings and Voting Rights" for further details). However, Shareholders should be aware that the ACD may change a Fund's investment objective and/or its investment policy without first obtaining Shareholder consent to the extent necessary to satisfy any changes to the Regulations. In these circumstances, Shareholders shall be given as much notice as is practicable in the circumstances.

Changes to the Company

From 2 June 2017, Valu-Trac Investment Management Limited replaced Fund Partners Limited as Authorised Corporate Director and Alternative Investment Fund Manager and Johnston Carmichael LLP replaced Deloitte LLP as auditors. National Westminster Bank PLC replaced State Street Trustees Limited as depositary on the same day.

From 2 June 2017, the Company name was changed to VT Allium Portfolio Funds from FP Allium Portfolio Funds.

At the same time the names of the sub-funds were changed to:

VT Multi-Asset DRP III from FP Multi-Asset DRP III

VT Multi-Asset DRP IV from FP Multi-Asset DRP IV

VT Multi Asset DRP V from FP Multi-Asset DRP V

ACCOUNTING POLICIES

For the 6 months ended 31 May 2017

The accounting policies applied are consistent with those of the financial statements for the year ended 30 November 2016 and are described in those financial statements.

The financial statements have been prepared in accordance with the Statement of Recommended Practice ('SORP') for Authorised Funds issued by the Investment Association in May 2014.

SUB-FUND OVERVIEW

Name of Sub-fund VT Multi-Asset DRP III

Size of Sub-fund £19,930,890

Launch date 8 March 2011

Investment objective and policy

The investment objective of the Fund aims to deliver long term capital growth from a broadly cautious approach to investing whilst ensuring that the overall volatility of the portfolio remains within its set volatility band that is typical for a cautious risk fund.

The Fund will seek to achieve its cautious objective through investment predominantly in derivative contracts ("Swaps"). The Fund will therefore receive a return linked to the performance of the basket of assets which underlie the Swaps. The basket will contain assets that enable the return to be linked to the performance of equities, bonds and cash. Cash, equivalent to the value of any unfunded position of the Swap contract, will be placed on deposit or invested directly in short dated Government Bonds, Treasury Bills and other money market instruments.

The Fund may also invest in directly held transferable securities, derivatives, cash, deposits, warrants and money market instruments. Investment may be made globally but foreign currency exposure through non UK investments may be hedged back into Sterling.

It is intended that derivatives will also be used for efficient portfolio management. In particularly volatile markets, the Fund may temporarily hold more than 10% in cash provided it is in accordance with the investment objective of the Fund.

As the Fund has the discretion to borrow up to 10% of the value of the property of the Fund, this facility may be used to help manage liquidity.

Use may also be made of stock lending

Accounting dates 30 November (Final) and 31 May (Interim)

Distribution date 31 January

Individual Savings Account (ISA) The Company is a qualifying investment for inclusion in an ISA.

It is intended that derivatives will also be used for efficient portfolio management. In particularly volatile markets, the Fund may temporarily hold more than 10% in cash provided it is in accordance with the investment objective of the Fund.

As the Fund has the discretion to borrow up to 10% of the value of the property of the Fund, this facility may be used to help manage liquidity.

Use may also be made of stock lending.

Investment Review

VT Multi-Asset DRP III posted a very respectable gain of 5.31%* in the period with steady returns from its Bond and Equity allocation. The fund follows an asset allocation framework and therefore the largest purchases over the period equate to the highest asset weightings in the portfolio.

*Source: Bloomberg

Market Review/ Outlook

The Pound's weakness relative to the Euro and US Dollar contributed to the positive performance of the Fund, with the currency gains predominantly accruing during the period of the Brexit vote. We do not envisage another FX performance contribution of this magnitude, over the course of the next six months. Gilts and UK Corporate Bonds performed strongly, as investors continued their search for yield, with North American Equities the stand out performer in the Fund's equity allocation. The investment team believe that equity and bond volatility will increase over the coming 12 months.

	Lowest unit price	116.80	106.51	106.22

PERFORMANCE RECORD

- 1 The operating charges per unit figure is calculated by applying the operating charges percentage to the average net asset valuation per share throughout the period.

 The operating charges percentage is based on the expenses incurred during the period annualised, as a proportion of the average net
- asset value of the fund.

Risk Profile

Based on past data, the fund is ranked a '4' on the synthetic risk and reward indicator scale (of 1 to 7) as described fully in the Key Investor Information Document. The Fund is ranked 4 because monthly historical performance data indicates that it has experienced average rises and falls in market prices.

PERFORMANCE RECORD (continued)

- 1 The operating charges per unit figure is calculated by applying the operating charges percentage to the average net asset valuation per share throughout the period.
- 2 The operating charges percentage is based on the expenses incurred during the period annualised, as a proportion of the average net asset value of the fund.

Risk Profile

Based on past data, the fund is ranked a '4' on the synthetic risk and reward indicator scale (of 1 to 7) as described fully in the Key Investor Information Document. The Fund is ranked 4 because monthly historical performance data indicates that it has experienced average rises and falls in market prices.

SUB-FUND OVERVIEW

Name of Sub-fund VT Multi-Asset DRP V

Size of Sub-fund £49,621,339

Launch date 8 March 2011

Investment objective and policy

The investment objective of the Fund aims to deliver long term capital growth from a broadly balanced approach to investing whilst ensuring that the overall volatility of the portfolio remains within its set volatility band that is typical for a balanced risk fund.

The Fund will seek to achieve its balanced objective through investment predominantly in derivative contracts ("Swaps"). The Fund will therefore receive a return linked to the performance of the basket of assets which underlie the Swaps. The basket will contain assets that enable the return to be linked to the performance of equities, bonds and cash. Cash, equivalent to the value of any unfunded position of the Swap contract, will be placed on deposit or invested directly in short dated Government Bonds, Treasury Bills and other money market instruments.

The Fund may also invest in directly held transferable securities, derivatives, cash, deposits, warrants and money market instruments. Investment may be made globally but foreign currency exposure through non UK investments may be hedged back into Sterling.

It is intended that derivatives will also be used for efficient portfolio management. In particularly volatile markets, the Fund may temporarily hold more than 10% in cash provided it is in accordance with the investment objective of the Fund.

As the Fund has the discretion to borrow up to 10% of the value of the property of the Fund, this facility may be used to help manage liquidity.

Use may also be made of stock lending

Accounting dates 30 November (Final) and 31 May (Interim)

Distribution date 31 January

Individual Savings Account (ISA) The Company is a qualifying investment for inclusion in an ISA.

Fund classes Retail class

Platform class

Initial Charge 5%

Minimum investment

Lump sum subscription: Retail class: £3,000 Platform class: £25,000

Top-up: Retail class: £1,000 (providing minimum holding is maintained)

Platform class: £5,000

Regular Savings Plan Retail class: £100 per month (minimum £50 per fund)
Platform class: £100 per month (minimum £50 per fund)

Holding: Retail class: £1,000 Platform class: £5,000

Redemption: Retail class: £1,000 (providing minimum holding is maintained)

Platform class: None

The ACD may at its discretion waive the initial charge and accept subscriptions lower than the minimum amount.

ACD charges

The annual management charge is 0.20% (per annum) for the Retail class and 0.95% (per annum) for the Platform class.

Changes to Sub-Fund

From 2 June 2017, Valu-Trac Investment Management Limited replaced Fund Partners Limited as Authorised Corporate Director.

Investment Objective

The investment objective of the Fund aims to deliver long term capital growth from a broadly balanced approach to investing whilst ensuring that the overall volatility of the portfolio remains within its set volatility band that is typical for a balanced risk fund.

Investment Policy

The Fund will seek to achieve its balanced objective through investment predominantly in a derivative contract ("Swap"). The Fund will therefore receive a return linked to the performance of the basket of assets which underlie the Swap. The basket will contain assets that enable the return to be linked to the performance of equities, bonds and cash. Cash, equivalent to the value of any unfunded position of the Swap contract, will be placed on deposit or invested directly in short dated Government Bonds, Treasury Bills and other money market instruments.

The Fund may also invest in directly held transferable securities, derivatives, cash, deposits, warrants and money market instruments. Investment may be made globally but foreign currency exposure through non UK investments may be hedged back into Sterling.

It is intended that derivatives will also be used for efficient portfolio management. In particularly volatile markets, the Fund may temporarily hold more than 10% in cash provided it is in accordance with the investment objective of the Fund.

As the Fund has the discretion to borrow up to 10% of the value of the property of the Fund, this facility may be used to help manage liquidity.

Use may also be made of stock lending.

Investment Review

VT Multi-Asset DRP V advanced by 8.42%* over the period. Key portfolio holdings in European and North American Equities were the top contributors. The Fund follows an asset allocation framework so the largest purchases over the period equate to the highest asset weightings in the portfolio.

*Source: Bloomberg

Market Review/ Outlook

The Pound's weakness relative to the Euro and US Dollar contributed to the positive performance of the Fund, with the currency gains predominantly accruing during the period of the Brexit vote. We do not envisage another FX performance contribution of this magnitude, over the course of the next six months. Gilts and UK Corporate Bonds performed strongly, as investors continued their search for yield, with the North American and MSCI UK holdings the stand out performers in the Fund's equity allocation. The investment team believe that equity and bond volatility will increase over the coming 12 months.

AJ Bell Investments LLP Investment Manager to the Fund

PERFORMANCE RECORD (continued)

- 1 The operating charges per unit figure is calculated by applying the operating charges percentage to the average net asset valuation per share throughout the period.
- 2 The operating charges percentage is based on the expenses incurred during the period annualised, as a proportion of the average net asset value of the fund.

Risk Profile

Based on past data, the fund is ranked a '4' on the synthetic risk and reward indicator scale (of 1 to 7) as described fully in the Key Investor Information Document. The Fund is ranked 4 because monthly historical performance data indicates that it has experienced average rises and falls in market prices.

Investment objective and policy

The investment objective of the Fund aims to deliver long term capital growth from a broadly tactical approach to investing whilst ensuring that the overall volatility of the portfolio remains within its set volatility band that is typical for a tactical risk fund.

The Fund will seek to achieve its tactical objective through investment predominantly in derivative contracts ("Swaps"). The Fund will therefore receive a return linked to the performance of the basket of assets which underlie the Swaps. The basket will contain assets that enable the return to be linked to the performance of equities, bonds and cash. Cash, equivalent to the value of any unfunded position of the Swap contract, will be placed on deposit or invested directly in short dated Government Bonds, Treasury Bills and other money market instruments.

The Fund may also invest in directly held transferable securities, derivatives, cash, deposits, warrants and money market instruments. Investment may be made globally but foreign currency exposure through non UK investments may be hedged back into Sterling.

It is intended that derivatives will also be used for efficient portfolio management. In particularly volatile markets, the Fund may temporarily hold more than 10% in cash provided it is in accordance with the investment objective of the Fund.

As the Fund has the discretion to borrow up to 10% of the value of the property of the Fund, this facility may be used to help manage liquidity.

Use may also be made of stock lending

Accounting dates 30 November (Final) and 31 May (Interim)

Distribution date 31 January

As the Fund has the discretion to borrow up to 10% of the value of the property of the Fund, this facility may be used to help manage liquidity.

Use may also be made of stock lending.

Investment Review

VT Multi-Asset DRP VI increased 9.41%* over the period. The recent rallies in US and European Equities contributed the most. The Fund follows an asset allocation framework so the largest purchases over the period equate to the highest asset weightings in the portfolio.

*Source: Bloomberg

Market Review/ Outlook

The Pound's weakness relative to the Euro and US Dollar contributed to the positive performance of the Fund, with the currency gains predominantly accruing during the period of the Brexit vote. We do not envisage another FX performance contribution of this magnitude, over the course of the next six months. Gilts and UK Corporate Bonds performed strongly, as investors continued their search for yield. Equity exposure within the Fund was the biggest contribution to performance with North American equities and the allocation to MSCI UK equities the stand out performers in asset allocation. Emerging market equities although volatile contributed as a result of the Pound's depreciation versus the U.S. Dollar. The investment team believe that equity and bond volatility will increase over the coming 12 months.

PERFORMANCE RECORD

- 1 The operating charges per unit figure is calculated by applying the operating charges percentage to the average net asset valuation per share throughout the period.

 The operating charges percentage is based on the expenses incurred during the period annualised, as a proportion of the average net
- asset value of the fund.

Risk Profile

Based on past data, the fund is ranked a '4' on the synthetic risk and reward indicator scale (of 1 to 7) as described fully in the Key Investor Information Document. The Fund is ranked 4 because monthly historical performance data indicates that it has experienced average rises and falls in market prices.

- 1 The operating charges per unit figure is calculated by applying the operating charges percentage to the average net asset valuation The operating charges per unit figure is calculated by applying the operating charges percentage to the average net asset valuation per share throughout the period.
 The operating charges percentage is based on the expenses incurred during the period annualised, as a proportion of the average net asset value of the fund.

Risk Profile

Based on past data, the fund is ranked a '5' on the synthetic risk and reward indicator scale (of 1 to 7) as described fully in the Key Investor Information Document. The fund has been classed as 5 because monthly historical performance data indicates that it has experienced relatively high rises and falls in market prices historically.

SUB-FUND OVERVIEW

Name of Sub-fund VT Multi-Asset DRP VIII

Size of Sub-fund £3,726,346

8 March 2011 Launch date

Investment objective and policy

The investment objective of the Fund aims to deliver long term capital growth from a broadly adventurous approach to investing whilst ensuring that the overall volatility of the portfolio remains within its set volatility band that is typical for a adventurous risk fund.

The Fund will seek to achieve its adventurous objective through investment predominantly in derivative contracts ("Swaps"). The Fund will therefore receive a return linked to the performance of the basket of assets which underlie the Swaps. The basket will contain assets that enable the return to be linked to the performance of equities, bonds and cash. Cash, equivalent to the value of any unfunded position of the Swap contract, will be placed on deposit or invested directly in short dated Government Bonds, Treasury Bills and other money market instruments.

The Fund may also invest in directly held transferable securities, derivatives, cash, deposits, warrants and money market instruments. Investment may be made globally but foreign currency exposure through non UK investments may be hedged back into Sterling.

It is intended that derivatives will also be used for efficient portfolio management. In particularly volatile markets, the Fund may temporarily hold more than 10% in cash provided it is in accordance with the investment objective of the Fund.

As the Fund has the discretion to borrow up to 10% of the value of the property of the Fund, this facility may be used to help manage liquidity.

Use may also be made of stock lending

Accounting dates 30 November (Final) and 31 May (Interim)

Distribution date 31 January

Individual Savings Account (ISA) The Company is a qualifying investment for inclusion in an ISA.

Platform class: None

The ACD may at its discretion waive the initial charge and accept subscriptions lower than the minimum amount.

ACD charges

The annual management charge is 0.20% (per annum) for the Retail class and 0.95% (per annum) for the Platform class.

Changes to Sub-Fund

From 2 June 2017, Valu-Trac Investment Management Limited replaced Fund Partners Limited as Authorised Corporate Director.

Investment Objective

The investment objective of the Fund aims to deliver long term capital growth from a broadly adventurous approach to investing whilst ensuring that the overall volatility of the portfolio remains within its set volatility band that is typical for an adventurous risk fund.

Investment Policy

The Fund will seek to achieve its adventurous objective through investment predominantly in a derivative contract ("Swap"). The Fund will therefore receive a return linked to the performance of the basket of assets which underlie the Swap. The basket will contain assets that enable the return to be linked to the performance of equities, bonds and cash. Cash, equivalent to the value of any unfunded position of the Swap contract, will be placed on deposit or invested directly in short dated Government Bonds, Treasury Bills and other money market instruments.

The Fund may also invest in directly held transferable securities, derivatives, cash, deposits, warrants and money market instruments. Investment may be made globally but foreign currency exposure through non UK investments may be hedged back into Sterling.

It is intended that derivatives will also be used for efficient portfolio management. In particularly volatile markets, the Fund may temporarily hold more than 10% in cash provided it is in accordance with the investment objective of the Fund.

As the Fund has the discretion to borrow up to 10% of the value of the property of the Fund, this facility may be used to help manage liquidity.

Use may also be made of stock lending.

Investment Review

VT Multi-Asset DRP VIII managed to gain 10.46%* over the period as US, Asian and Emerging Market Equities rallied over the past six months. The significant weighting of Equities in the portfolio resulted in strong performance as markets gained in the final quarter. The Fund follows an asset allocation framework so the largest purchases over the period equate to the highest asset weightings in the portfolio.

*Source: Bloomberg

Market Review/ Outlook

The Pound's weakness relative to the Euro and US Dollar contributed to the positive performance of the Fund, with the currency gains predominantly accruing during the period of the Brexit vote. We do not envisage another FX performance contribution of this magnitude, over the course of the next six months. Gilts and UK Corporate Bonds performed strongly, as investors continued their search for yield. Equity exposure within the Fund was the biggest contribution to performance with North American equities and the allocation to MSCI UK equities the stand out performers in asset allocation. Emerging market equities although volatile contributed as a result of the Pound's depreciation versus the U.S. Dollar. Concerns around the China credit cycle continue, with our view being that emerging market equities (along with general equities and bonds) will continue to increase in volatility in coming months.

AJ Bell Investments LLP Investment Manager to the Fund

PERFORMANCE RECORD (continued)

- 1 The operating charges per unit figure is calculated by applying the operating charges percentage to the average net asset valuation per share throughout the period.

 The operating charges percentage is based on the expenses incurred during the period annualised, as a proportion of the average net
- asset value of the fund.

Risk Profile

Based on past data, the fund is ranked a '5' on the synthetic risk and reward indicator scale (of 1 to 7) as described fully in the Key Investor Information Document. The fund has been classed as 5 because monthly historical performance data indicates that it has experienced relatively high rises and falls in market prices historically.

GENERAL INFORMATION

STRUCTURE OF VT ALLIUM PORTFOLIO FUNDS

The Company is structured as an umbrella company, in that different sub-funds may be established from time to time by the ACD with the approval of the Financial Conduct Authority and the agreement of the Depositary. On the introduction of any new sub-fund or class, a revised prospectus will be prepared setting out the relevant details of each sub-fund or class.

The assets of each sub-fund are legally segregated from those of every other sub-fund and will be invested in accordance with the investment objective and investment policy applicable to that sub-fund. The sub-funds which are currently available are:

VT Multi-Asset DRP III VT Multi-Asset DRP IV VT Multi-Asset DRP V VT Multi-Asset DRP VI VT Multi-Asset DRP VII VT Multi-Asset DRP VIII

In the future there may be other sub-funds of the Company.

CLASSES OF SHARES

The Company can issue different classes of shares in respect of any sub-fund.

Holders of income shares are entitled to be paid the income attributable to such shares, in accordance with the distribution dates per the prospectus.

Holders of accumulation shares are not entitled to be paid the income attributable to such shares, but that income is retained and accumulated for the benefit of shareholders and is reflected in the price of shares.

VALUATION POINT

The valuation point of the Company is 12.00 noon on each business day in the UK.

BUYING AND SELLING SHARES

The ACD will accept orders to deal in the shares on normal business days between 8.30am and 5.30pm. Instructions to buy or sell shares may be either in writing to Valu-Trac Administration Services, Orton, Moray IV32 7QE or by email to allium@valu-trac.com. A contract note will be issued by close of business on the next business day after the dealing date to confirm the transaction.

PRICES

The most recent prices of shares are available on the website of the Investment Association at www.investmentuk.org under the heading Valu-Trac Administration Services or by calling 01343 880344 during the ACD's normal business hours.

OTHER INFORMATION

The Instrument of Incorporation, Prospectus, Key Investor Information Documents and the most recent interim and annual reports may be inspected at the office of the ACD and copies may be obtained upon application.

RISK WARNING

An investment in an open-ended investment company should be regarded as a medium to long term investment. Investors should be aware that the price of shares and the income from them can fall as well as rise and investors may not receive back the full amount invested. Past performance is not a guide to future performance. Investments denominated in currencies other than Pounds sterling are subject to fluctuation in exchange rates, which can be favourable or unfavourable.
