

# AJ Bell Cautious Ready-made portfolio half-yearly update

As of 30/06/2021

## Commentary

Over the first half of 2021, the Cautious portfolio delivered a positive return of 1.7%, contributing to an overall return of 20.3% since launch on 12 December 2018. Across this half-year, Fidelity Global Special Situations was a strong performer, delivering 8.3% – albeit 2.9% behind its representative index.

The half-year saw economic growth and inflation forecasts rise following the vaccine rollout and a large US fiscal stimulus. This triggered a sell-off in bond markets, as investors anticipated interest rates being raised sooner than previously thought. Conversely, stock markets soared higher – with the notable exception of Japan – as positive sentiment around economic reopening increased.

The overall outlook appears brighter than at any time in the past 18 months. Vaccination programmes are nearing completion in many developed nations, and donations of excess vaccine stocks to developing nations are finally picking up pace. As such, the focus for markets has shifted to the strength of the economic rebound, and the corresponding rise in inflation. When central banks will need to raise interest rates to combat this is a key question on many investors' lips.

Following our annual strategic asset allocation review, we made several changes to the Cautious portfolio in the last half-year. We reduced the allocation to three funds – the Fidelity Strategic Bond fund from 30% to 28%, the Ninety One UK Alpha fund from 15% to 6%, and the Janus Henderson Absolute Return fund from 10% to 6%. This allowed us to increase the allocation to the Fidelity Global Special Situations fund from 5% to 20%.

*Please note: these changes will not be made in a Ready-made portfolio that you already hold in your account. Responsibility for managing your portfolio rests with you. This report isn't a personal recommendation to buy or sell these investments.*

## H1 Stock market performance

-0.4% 13.7%

Heat map of global stock market returns by region. Source: Morningstar direct

## Returns

January - June 2021	1.71%
1 year	7.90%
Since inception	20.29%

## Portfolio snapshot

Estimated 12-month yield	2.18%
Inception date	12/12/2018
Average OCF of portfolio	0.62%

The portfolio yield is calculated on a backward looking basis covering the last 12-month period using the current Ready-made portfolio weightings.

The portfolio's ongoing charges figure (OCF) is a weighted average of the OCF of each of the underlying funds, using the Ready-made portfolio weights at the end of the reported period. The Portfolio's OCF does not include AJ Bell Youinvest's custody charge.

## Portfolio rating

The risk rating of the portfolio depends on the type of assets it invests in. Bonds are more conservative because they offer a more certain (though typically lower) return. Shares are more aggressive because they offer a less certain (though typically higher) return.

Keep in mind this applies over the longer term: five years or more.
