

# VT AJ Bell Moderately Adventurous Q4 2020 Report

## Commentary

When the first successful trials of the Pfizer-BioNTech COVID-19 vaccine were announced in early November 2020, share prices worldwide reacted positively. Global markets have been sensitive to developments around the pandemic and this trend continued as more successful vaccine trials were announced from Moderna and Oxford-AstraZeneca.

UK markets did particularly well here, seeing one of their largest single-day gains and rising over 10% across the quarter. This prompted speculation around a shift in sentiment from technology and 'growth' stocks – which have been in vogue during 2020 – to more traditional industries and so-called 'value' stocks, which should see a recovery in earnings once lockdown restrictions are lifted. The trade deal reached between the UK and EU on Christmas Eve also gave investors some clarity on the future relationship between the two trading partners, providing another boost for domestic shares.

Further afield, discord surrounding the results of the US presidential election contributed to underperformance this quarter in American stocks and bonds. The pound sterling has performed well against the US dollar, which had a negative effect for UK-based investors.

In the Moderately Adventurous fund, we are well exposed to both domestic and international holdings. This has led to a total return of 8.0% over the quarter and a 12-month return of 5.5%.

## Asset Breakdown

Shares	75.9%
